The addition of sugar to canned vegetables is not for preservative purposes. Added sugar increases the tendency to fermentation. It is added wholly as a condimental ingredient. Sodid nitrate plays a very important role as a beet fertilizer and upon general principles it may be admitted that (60 kilos may be used to the acre, half of which at the time of seeding as a surface dressing, the remainder in equal quantities just before the first and then before the second hoeings. The soil dressing under these conditions means that the plant food has been assimilated under the best possible conditions and there need be no apprehension of loss in case...
